

# SUSHI TIME

FUN FACTS

# ABOUT

Sushi Time was created for those who love eating sushi and wanted to learn more about it. This project features 9 different types, and it also gives insights into some things that a lot of people still gets confused about.

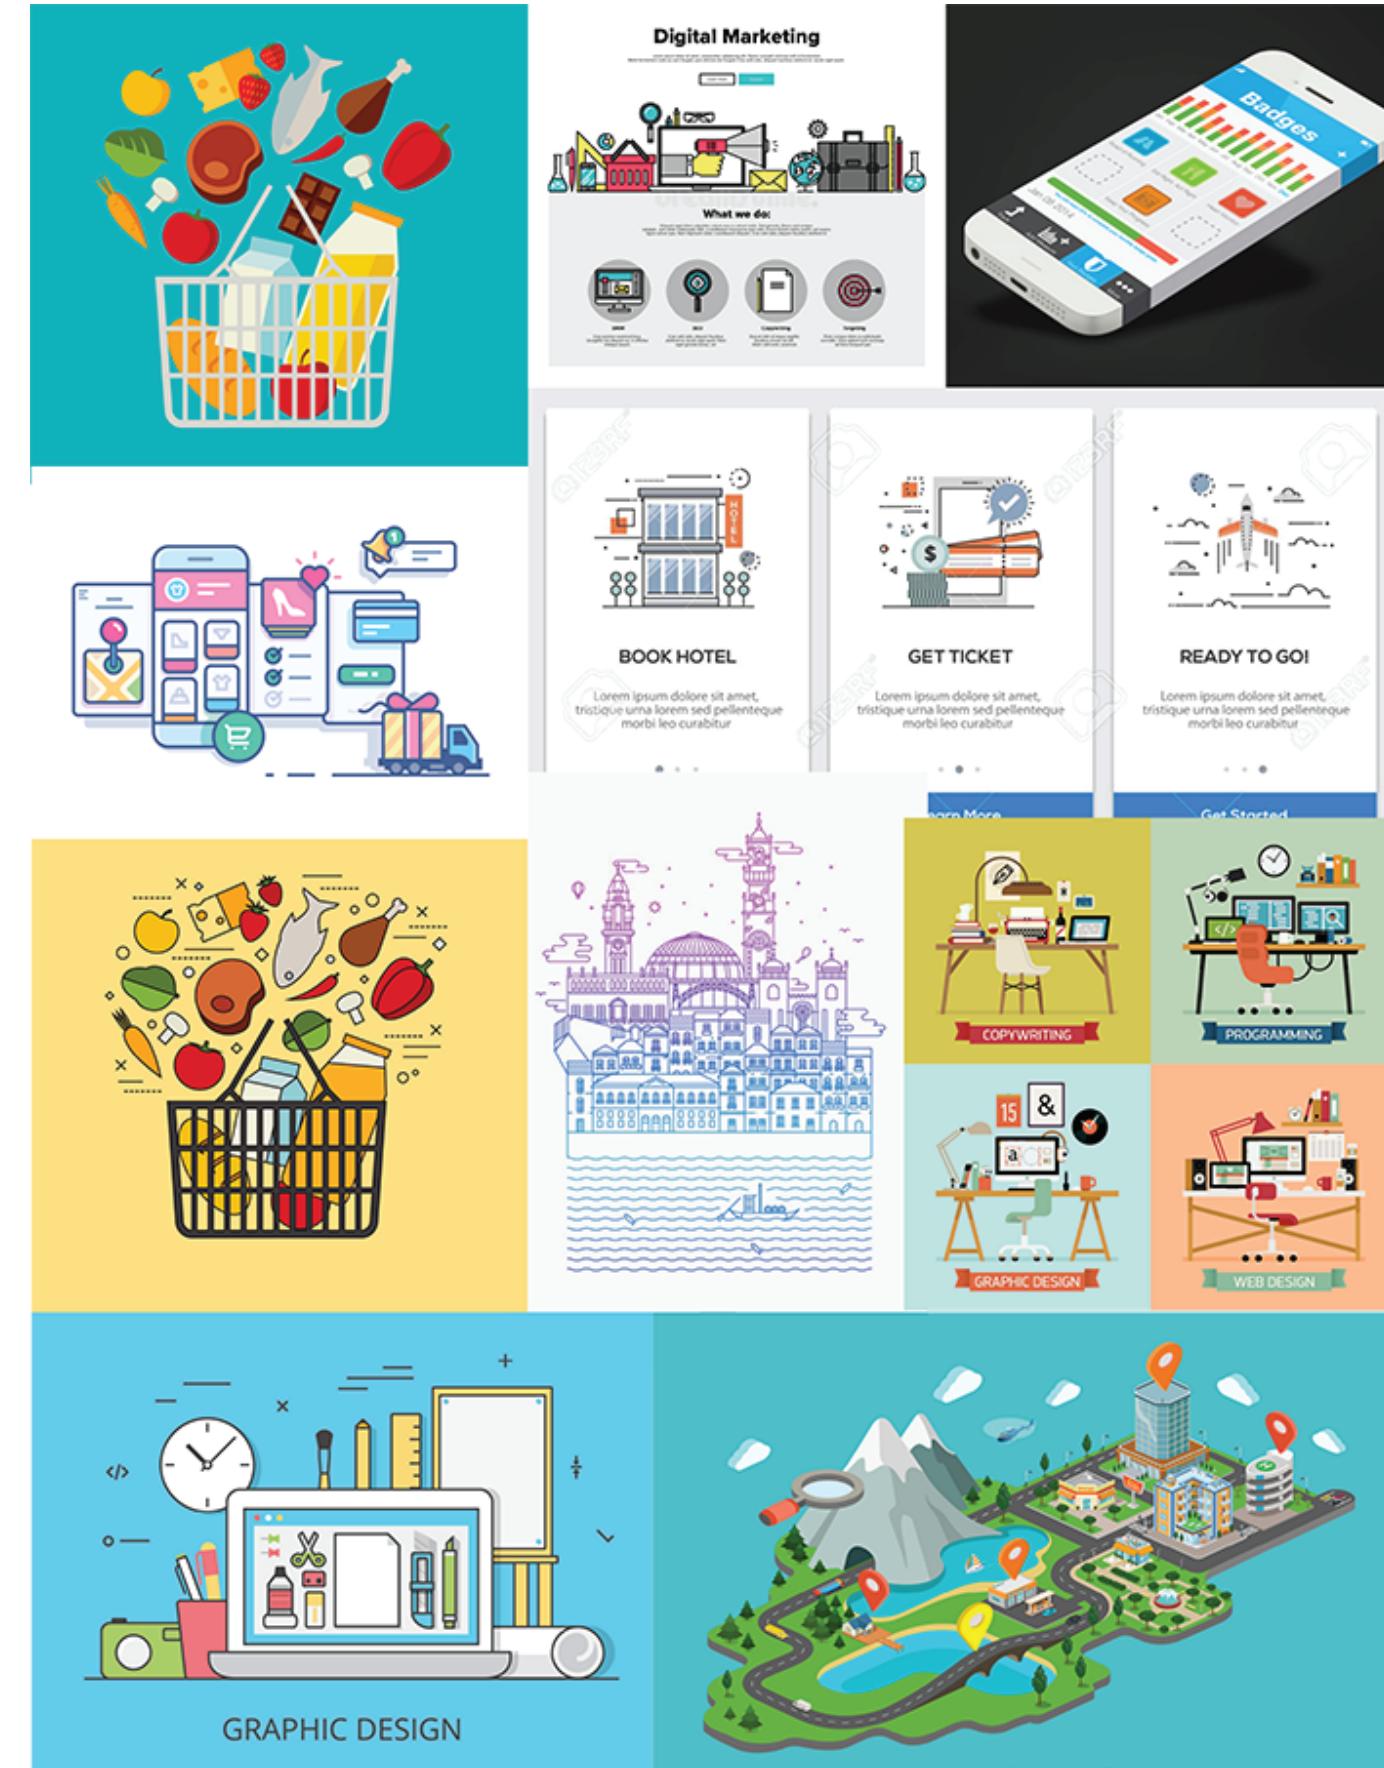

# Why did I change my project?

It became **frustrating**, and I lost hope. I started hating coding more than ever because I couldn't create a final project I was confident in presenting to the class.

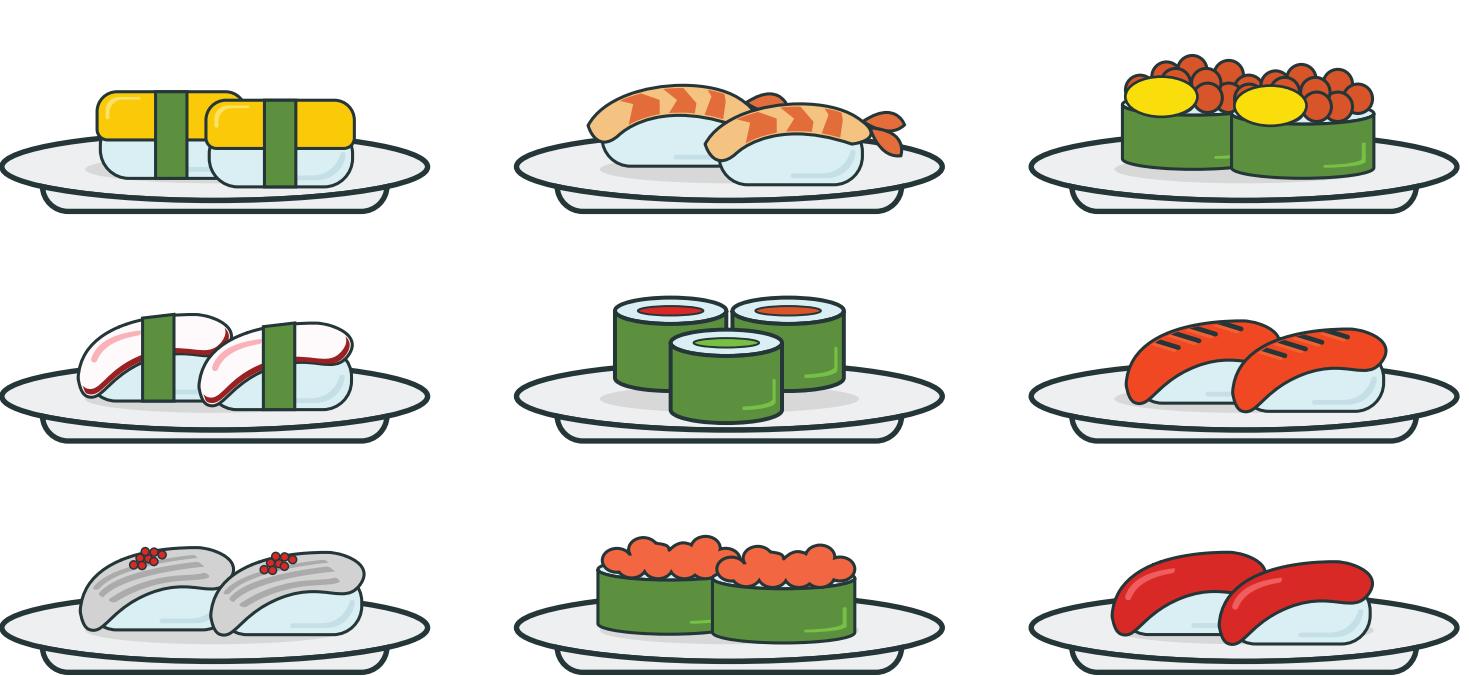

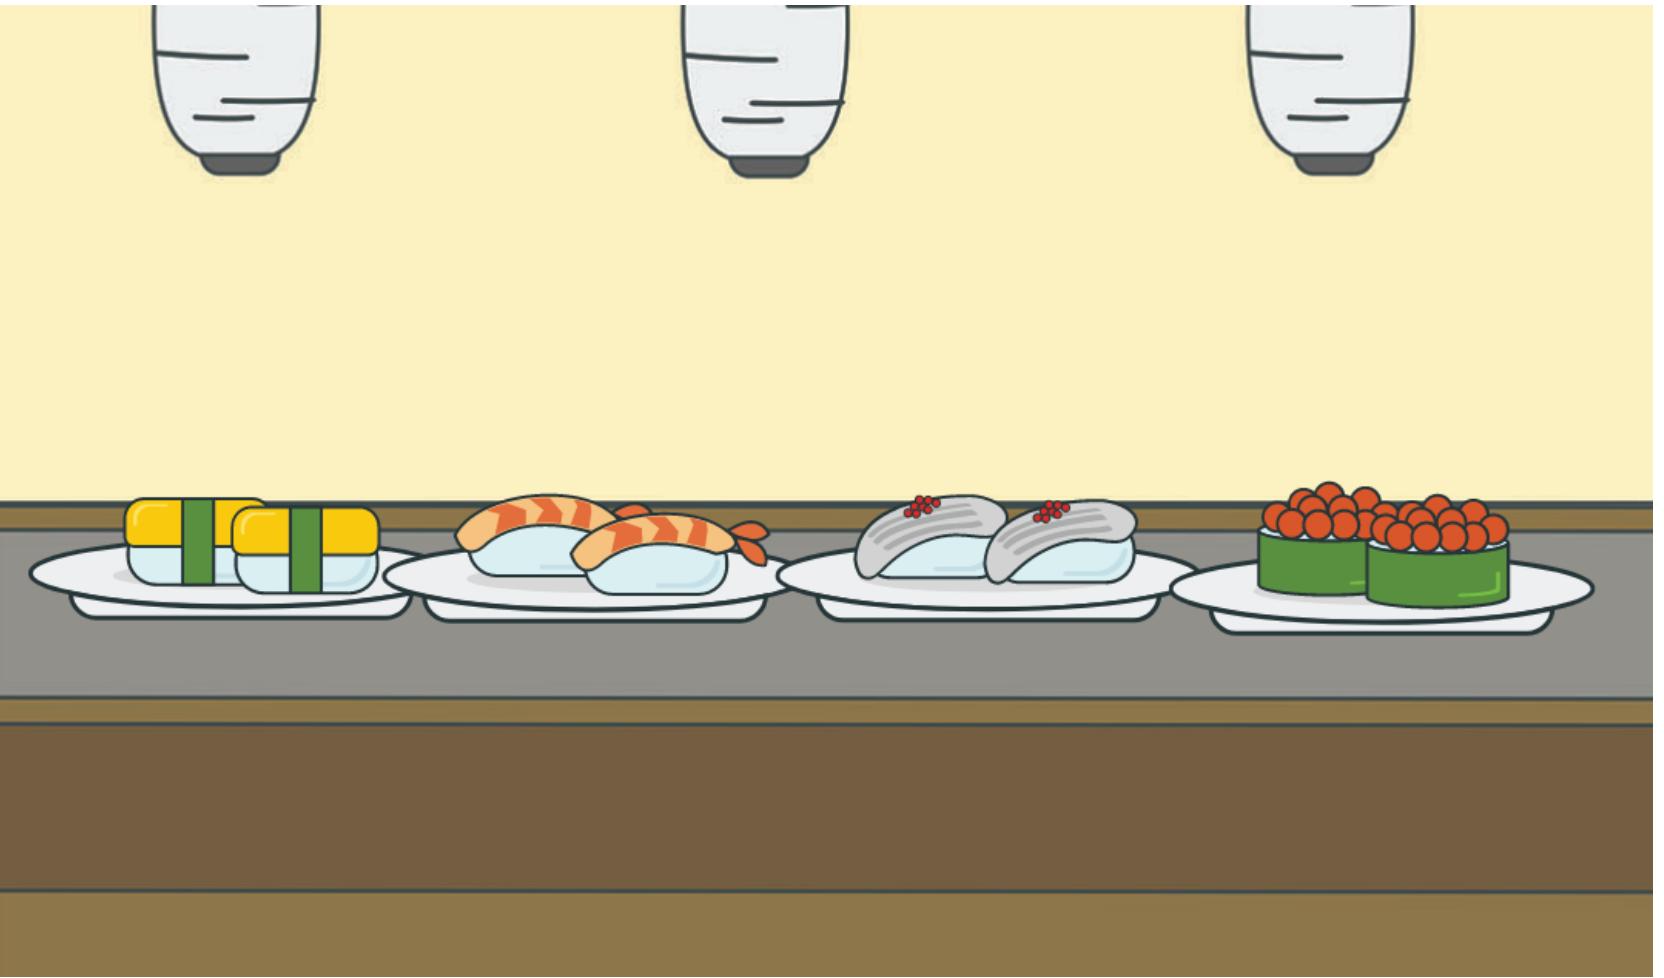

I **accepted** that I'm not very knowledgeable in coding, and I realized my project was a bit too hard and ambitious.

I wanted to create something **fun** and **enjoyable** that wont make me hate coding and leave DES157 with bad feelings.

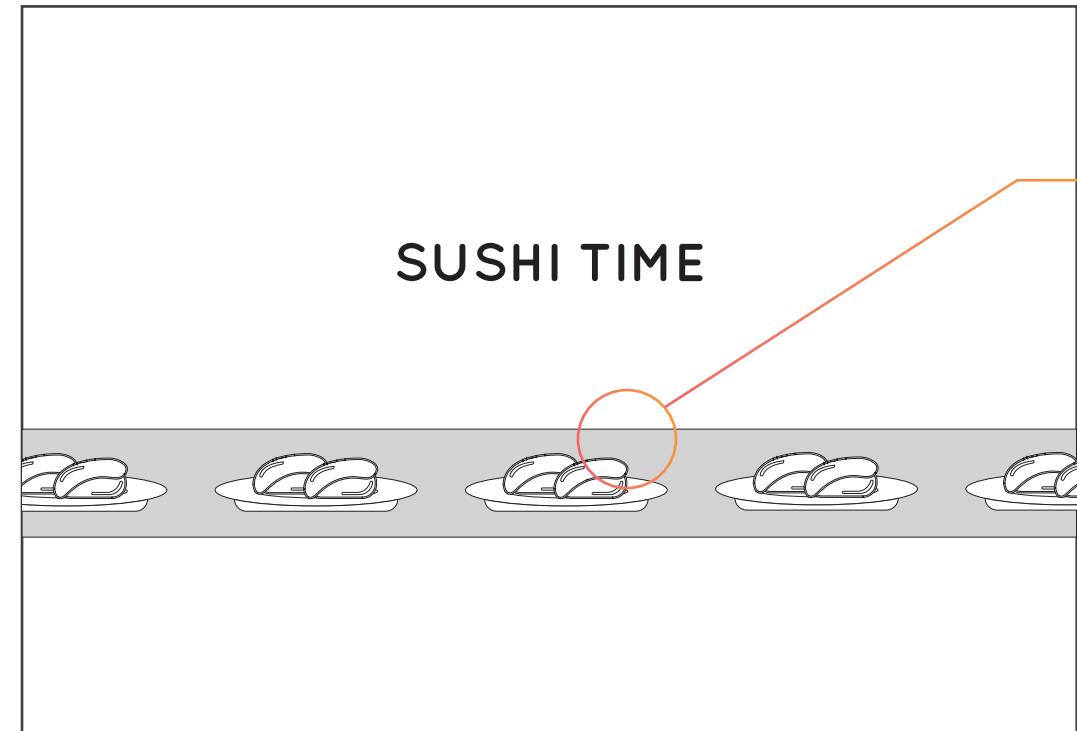

# Graphics Moodboard

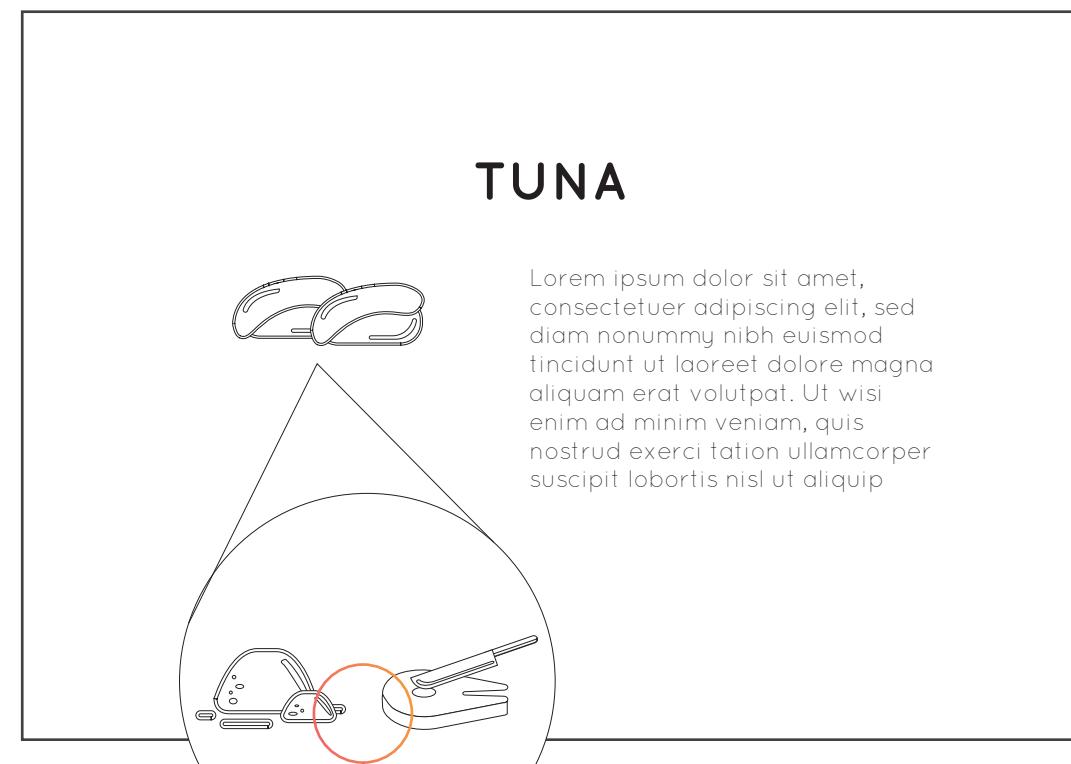

# Studio 4

# Wireframes

- moving belt line with new sushi coming out
- drag the plate you are interested in to the bottom
- opens up a page description on what it is

- ingredients will pop up if you click the main sushi image

# Carrousel Inspiration
